PayMate India Limited (formerly known as PayMate India Private Limited)
(CIN: U72200MH2006PLC205023)
Summary of Significant Accounting Policies

1. Corporate Information

PayMate India Limited (formerly known as PayMate India Private Limited) (the Company/ Parent Company) together with its subsidiary, the principal activities of the Group consist of providing services in B2B payments for Enterprise and SME across supply chains. The PayMate platform provides a comprehensive digital workflow tied to payments which enable greater control and transparency along with better cash flows and an end to end reconciliation for a superior experience for Enterprise and SME in closed-loop supply chains.

The Company incorporated under the provisions of the Companies Act, 1956. The Company was incorporated on May 12, 2006 and is having its registered office at No.111, 1st Floor, 'A' Wing, Sundervilla S.V.Road, Santacruz (West) Mumbai Maharashtra 400054 India.

2. Significant Accounting Policies

Significant accounting policies adopted by the company are as under:

2.1 Basis of accounting and preparation of financial statements

(i) Statement of Compliance with Ind AS

These Standalone financial statements have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under Section 133 of the Companies Act, 2013 (the "Act") read with the Companies (Indian Accounting Standards) Rules, 2015 and Companies (Indian Accounting Standards) Amendment Rules, 2016.

The Standalone financial statements up to year ended 31 March 2021 were prepared in accordance with the accounting standards notified under the section 133 of the Act, read with paragraph 7 of the Companies (Accounts) Rules, 2014 (Indian 'GAAP').

These Standalone financial statements for the year ended 31 March 2022 are the first set of financial statements prepared in accordance with Ind AS with the transition date of 1st April 2020. Refer reconciliation annexure for an explanation of how the Company has adopted Ind AS.

Accounting policies have been consistently applied to all the years presented except where a newly issued accounting standard is initially adopted or a revision to an existing accounting standard requires a change in the accounting policy hitherto in use.

(ii) **Functional and presentation currency**

These standalone Financial statements are presented in Indian Rupees (INR), which is also the Company's functional currency. All financial information presented in Indian rupees have been rounded-off to two decimal places to the nearest million except share data or as otherwise stated.

(iii) **Basis of measurement**

The standalone Financial statements have been prepared on the historical cost basis except for the following items:

- Certain financial assets and liabilities : Measured at fair value
- Net defined benefit (asset)/ liability : Fair value of plan assets less present value of defined benefit obligations
- Borrowings : Amortised cost using effective interest rate method
- Equity settled share based payments at grant date : Measured at fair value

(iv) **Use of estimates and judgements**

The preparation of the standalone financial statements in conformity with Ind AS requires management to make estimates, judgements and assumptions. These estimates, judgements and assumptions affect the application policies and reported amounts of the assets and liabilities, the disclosure of contingent assets and liabilities at the date of financial statements and reported amounts of revenue and expenses during the period. Accounting estimates could change from period to period. Actual results could differ from those estimates. Appropriate changes in the estimates are made as and when management becomes aware of changes in circumstances surrounding the estimates. Changes in the estimates are reflected in the financial statements in the period in which the changes are made and, if material, such effects are disclosed in the notes to financial statements.

Assumptions and estimation uncertainties

Information about assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment within the next financial year are included in the following notes:

- Note 27 - measurement of defined benefit obligations: key actuarial assumptions;
- Note 2.2 (m) & 25 - recognition and measurement of provisions and contingencies: key assumptions about the likelihood and magnitude of an outflow of resources;
- Note 2.2 (o) - impairment of financial assets;
- Note 2.2 (e) & (f) - determining an asset's expected useful life and the expected residual value at the end of its life.

(v) **Measurement of fair values**

Accounting policies and disclosures require measurement of fair value for both financial and non-financial assets.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability or
- In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible by the Company. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data is available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

Fair values are categorised into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows.

Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

When measuring the fair value of an asset or a liability, the Company uses observable market data as far as possible. If the inputs used to measure the fair value of an asset or a liability fall into different levels of the fair value hierarchy, then the fair value measurement is categorised in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

The Company recognizes transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

Further information about the assumptions made in the measuring fair values is included in the following notes:

- Note 2.2 (n) & 33 - Financial Instruments

(vi) **Current and non-current classification:**

The Schedule III to the Act requires assets and liabilities to be classified as either current or non-current. The Company presents assets and liabilities in the balance sheet based on current/ non-current classification.

Assets

An asset is classified as a current when:

- it is expected to be realised in, or is intended for sale or consumption in, the Company's normal operating cycle;
- it is expected to be realised within twelve months from the reporting date;
- it is held primarily for the purposes of being traded; or
- is cash or cash equivalent unless it is restricted from being exchanged or used to settle a liability for at least twelve months after the reporting date.

All other assets are classified as non current

Liabilities

A liability is classified as a current when:

- it is expected to be realised in, or is intended for sale or consumption in, the Company's normal operating cycle;
- it is due to be settled within twelve months from the reporting date;
- it is held primarily for the purposes of being traded;
- Deferred tax assets/liabilities are classified as non-current.
- the Company does not have an unconditional right to defer settlement of liability for at least twelve months from the reporting date.

All other liabilities are classified as non-current.

Operating Cycle

Operating cycle is the time between the acquisition of assets for processing and realisation in cash or cash equivalents. The Company has ascertained its operating cycle as 12 months for the purpose of current or non-current classification of assets and liabilities.

2.2 Summary of significant accounting policies

a Revenue recognition

Sale of services

Revenue is measured based on the consideration specified in a contract with a customers net of variable consideration e.g. discounts, volume rebates, any payments made to a customer (unless the payment is for a distinct good or service received from the customer) and excludes amount collected on behalf of third parties. The Company recognises revenue when it transfers control over a product or service to the customer. Revenue is only recognised to the extent that is highly probable that a significant reversal will not occur.

Where the Company acts as an agent for selling goods or services, only the commission income is included within revenue. The specific revenue recognition criteria described below must also be met before revenue is recognised. Typically, the Company has a right to payment before or at the point that services are delivered. Cash received before the services are delivered is recognised as contract liability. The amount of consideration does not contain a significant financing component as payment terms are less than one year.

Service Fee from Merchants:

The Company earns service fee from merchants and recognises such revenue when the control in services have been transferred by the Company i.e. as and when services have been provided by the Company. Such service fee is generally determined as a percentage of transaction value executed by the merchants.

The Company derives its revenue primarily from the Transaction Fees and related services and licensing income. The Company recognises revenue on transaction fees immediately upon completion of successful transaction and the collectability is reasonably assured.

Recognition of dividend income, Interest income

Interest income is recognised using the effective interest rate method.

Interest income from a financial asset is recognised when it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

b Cash and cash equivalents

Cash and cash equivalents comprise cash on hand and demand deposits with banks other than deposits pledged with government authorities and margin money deposits.

Cash and cash equivalent in the Balance Sheet comprise cash at banks and on hand and short-term deposits with a maturity of three months or less, which are subject to insignificant risk of changes in value. Bank borrowings are generally considered to be financing activities. However, for the purposes of the statement of cash flows, bank overdrafts which are repayable on demand form an integral part of an entity's cash management, accordingly, bank overdrafts are included as a component of cash and cash equivalents.

c Cash flow statement

PayMate India Limited (formerly known as PayMate India Private Limited)

(CIN: U72200MH2006PLC205023)

Summary of Significant Accounting Policies

Cash flows are reported using the indirect method, whereby profit / (loss) before extraordinary items and tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating, investing and financing activities of the Company are segregated based on the available information.

d Taxes on income

Income-tax comprises current and deferred tax. It is recognised in profit or loss except to the extent that it relates to an item recognised directly in equity or in other comprehensive income.

i) Current tax

Current tax comprises the expected tax payable or receivable on the taxable income or loss for the year and any adjustment to the tax payable or receivable in respect of previous years. The amount of current tax reflects the best estimate of the tax amount expected to be paid or received after considering the uncertainty, if any, related to income taxes. It is measured using tax rates (and tax laws) enacted or substantively enacted by the reporting date.

Current tax assets and current tax liabilities are offset only if there is a legally enforceable right to set off the recognised amounts, and it is intended to realise the asset and settle the liability on a net basis or simultaneously.

ii) Deferred tax

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the corresponding amounts used for taxation purposes. Deferred tax is not recognised for:

- temporary differences arising on the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss at the time of the transaction; and

- temporary differences related to investments in subsidiaries to the extent that the Company is able to control the timing of the reversal of the temporary differences and it is probable that they will not reverse in the foreseeable future.

Deferred tax assets are recognised to the extent that it is probable that future taxable profits will be available against which they can be used. The existence of unused tax losses is strong evidence that future taxable profit may not be available. Therefore, in case of a history of recent losses, the Company recognises a deferred tax asset only to the extent that it has sufficient taxable temporary differences or there is convincing other evidence that sufficient taxable profit will be available against which such deferred tax asset can be realised. Deferred tax assets - unrecognised or recognised, are reviewed at each reporting date and are recognised/ reduced to the extent that it is probable/ no longer probable respectively that the related tax benefit will be realised.

Deferred tax is measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on the laws that have been enacted or substantively enacted by the reporting date.

The measurement of deferred tax reflects the tax consequences that would follow from the manner in which the Company expects, at the reporting date, to recover or settle the carrying amount of its assets and liabilities.

iii) Minimum Alternative Tax

Minimum Alternative Tax (MAT) under the provisions of the Income-tax Act, 1961 ("the IT Act") is recognised as current tax in the statement of Profit and Loss. The credit availed under the IT Act in respect of MAT paid is recognised as an asset only when and to the extent there is convincing evidence that the Company will pay normal income tax during the period for which the MAT credit can be carried forward for set-off against normal tax liability. MAT credit recognised as an asset is reviewed at each balance sheet date and written down to the extent the aforesaid convincing evidence no longer exists.

The Taxation Laws (Amendment) Ordinance, 2019 ('Ordinance') was promulgated on September 20, 2019. The Ordinance has amended the Income Tax Act, 1961 and Finance Act, 2019 to inter-alia provide an option to domestic companies to pay income tax at a reduced tax of 22 percent plus applicable surcharge and cess with certain conditions to be met. The Company has opted to apply the provisions of section 115BAA from the Assessment year 2020-21 (year ended March 31, 2020) and accordingly, the Company has charged off the balance of MAT credit during the year ended March 31, 2020.

e Property, Plant and Equipment

i) Recognition and measurement

Freehold land is carried at historical cost. All other items of property, plant and equipment are stated at historical cost less accumulated depreciation and accumulated impairment loss, if any. Cost of an item of property, plant and equipment comprises its purchase price, including import duties and non-refundable purchase taxes, after deducting trade discounts and rebates, any directly attributable cost of bringing the item to its working condition for its intended use and estimated costs of dismantling and removing the item and restoring the site on which it is located. If significant parts of an item of property, plant and equipment have different useful lives, then they are accounted for as separate items (major components) of property, plant and equipment.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. The carrying amount of any component accounted for as a separate asset is derecognised when replaced. All other repairs and maintenance are charged to statement of profit or loss during the reporting period in which they are incurred. If an item of property, plant and equipment is purchased with deferred credit period from supplier, such asset is recorded at its cash price equivalent value.

Advances paid towards the acquisition of property, plant and equipment outstanding at each balance sheet date is classified as capital advances under other non-current assets and the cost of assets not put to use before such date are disclosed under 'Capital work-in-progress'.

Summary of Significant Accounting Policies

ii) Depreciation

Depreciation is provided using the Straight-line Method over the useful lives of the assets as estimated by the Management. Depreciation on additions and deletions are restricted to the period of use. Depreciation is charged to statement of profit and loss.

The Company, based on technical assessment and management estimate, depreciates certain items of property, plant and equipment over estimated useful lives which are different from the useful life prescribed in Schedule II to the Act. The Management believes that these estimated useful lives are realistic and reflect fair approximation of the period over which the assets are likely to be used. The Company has estimated the following useful lives to provide depreciation on its property, plant and equipment:

Summary of the nature of Asset and estimated Useful life of the assets are as follows:

Computer & Software	- 3-5 Years
Office Equipment	- 5 Years
Furniture & Fittings	- 10 Years
Leasehold Improvements	- Over primary lease period

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount. Gains or losses arising from disposal of property, plant and equipment which are carried at cost are recognised in the statement of profit and loss.

Depreciation on addition to property plant and equipment is provided on pro-rata basis from the date of acquisition. Depreciation on sale/deduction from property plant and equipment is provided up to the date preceding the date of sale, deduction as the case may be. Gains and losses on disposals are determined by comparing proceeds with carrying amount. These are included in Statement of Profit and Loss under 'Other Income'.

Depreciation methods, useful lives and residual values are reviewed periodically at each financial year end and adjusted prospectively, as appropriate.

f Intangible assets

Intangible assets purchased including acquired in business combination, are measured at cost as at the date of acquisition, as applicable, less accumulated amortisation and accumulated impairment, if any.

Intangible assets consist of Patents and other rights under licensing agreement.

Intangible assets are amortised on a straight-line basis over the period of its economic useful life.

Summary of the nature of intangibles and their estimated useful lives as follows:

Patents	- 5 Years
Application	- 5 Years

g Business combination and Goodwill

i) Business combination

Business combinations are accounted for using the purchase (acquisition) method. The cost of an acquisition is measured as the fair value of the assets transferred, liabilities incurred or assumed and equity instruments issued at the date of exchange by the Company. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at fair value at the date of acquisition. Transaction costs incurred in connection with a business acquisition are expensed as incurred.

The cost of an acquisition also includes the fair value of any contingent consideration measured as at the date of acquisition. Any subsequent changes to the fair value of contingent consideration classified as liabilities, other than measurement period adjustments, are recognized in the statement of profit and loss.

ii) Goodwill

The excess of the cost of acquisition over the Company's share in the fair value of the acquiree's identifiable assets and liabilities is recognized as goodwill. If the excess is negative, a bargain purchase gain is recognized in equity as capital reserve. Goodwill is measured at cost less accumulated impairment (if any).

Goodwill associated with the disposal of an operation that is part of cash-generating unit is measured on the basis of the relative values of the operation disposed of and the portion of the cash-generating unit retained, unless the entity can demonstrate that some other method better reflects the goodwill associated with the operation disposed off.

h Employee benefits

i) Short-term employee benefits

Liabilities for wages and salaries, including non-monetary benefits that are expected to be settled wholly within 12 months after the end of the period in which the employees render the related service are recognised in respect of employees' services upto the end of the reporting period and are measured on an undiscounted basis at the amounts expected to be paid when the liabilities are settled. The liabilities are presented as current employee benefit obligations in the balance sheet.

ii) Defined contribution plans

A defined contribution plan is a post-employment benefit plan under which an entity pays fixed contributions into a separate entity and will have no legal or constructive obligation to pay further amounts. The Group makes specified monthly contributions towards Government administered provident fund scheme and other funds. Obligations for contributions to defined contribution plans are recognised as an employee benefit expense in statement of profit and loss in the periods during which the related services are rendered by employees.

iii) **Defined benefit plans**

A defined benefit plan is a post-employment benefit plan other than a defined contribution plan. The liability or asset recognised in the balance sheet in respect of defined benefit plans is the present value of the defined benefit obligation at the end of the reporting period less the fair value of plan assets. The defined benefit obligation is calculated annually by a qualified actuary using the projected unit credit method.

The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows by reference to market yields at the end of the reporting period on government bonds that have terms approximating to the terms of the related obligation. The net interest cost is calculated by applying the discount rate to the net balance of the defined benefit obligation and the fair value of plan assets. This cost is included in employee benefit expense in the statement of profit and loss.

Remeasurement gains and losses arising from experience adjustments and changes in actuarial assumptions are recognised in the period in which they occur, directly in other comprehensive income. They are included in retained earnings in the statement of changes in equity and in the balance sheet.

Changes in the present value of the defined benefit obligation resulting from plan amendments or curtailments are recognised immediately in profit or loss as past service cost.

iv) **Share based payments**

Employees of the Company receive remuneration in the form of share-based payments, whereby employees render services as consideration for equity instruments. The cost of equity-settled transactions is determined by the fair value at the date when the grant is made. The grant date fair value of options granted to employees is recognised as employee expense with a corresponding increase in employee stock options reserve, over the period in which the eligibility conditions are fulfilled and the employees unconditionally become entitled to awards. The cumulative expense recognised for equity-settled transactions at each reporting date until the vesting date reflects the extent to which the vesting period has expired and the Company's best estimate of the number of equity instruments that will ultimately vest. The statement of profit and loss expense or credit for a period represents the movement in cumulative expense recognised as at the beginning and end of that period and is recognised in employee benefits expense from the Assessment year 2020-21 (year ended March 31, 2020) and accordingly, the Company has charged off the balance of MAT credit during t

i) **Foreign currency transactions and translations**

Monetary and non-monetary transactions in foreign currencies are initially recorded in the functional currency of the Company at the exchange rates at the date of the transactions. Monetary foreign currency assets and liabilities remaining unsettled on reporting date are translated at the rates of exchange prevailing on reporting date. Gains/(losses) arising on account of realisation/settlement of foreign exchange transactions and on translation of monetary foreign currency assets and liabilities are recognised in the standalone statement of profit and loss.

Foreign operations

The assets and liabilities of foreign operations, are translated into Indian rupees (INR), the functional currency of the Company at the exchange rate at the reporting date. The income and expenses of foreign operations are translated to Indian rupees (INR) at exchange rates at the date of transactions or an average rate if the average rate approximates the actual rate at the date of transaction.

Foreign currency translation differences are recognised in other comprehensive income and accumulated in equity and attributed to non-controlling interests as applicable.

j) **Leases**

Lease contracts entered by the Company majorly pertain for buildings taken on lease to conduct its business in the ordinary course.

Company as a Lessee:

The Company applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Company recognises lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

The Company determines the lease term as the non-cancellable period of a lease, together with both periods covered by an option to extend the lease if the Company is reasonably certain to exercise that option; and periods covered by an option to terminate the lease if the Company is reasonably certain not to exercise that option. In assessing whether the Company is reasonably certain to exercise an option to extend a lease, or not to exercise an option to terminate a lease, it considers all relevant facts and circumstances that create an economic incentive for the Company to exercise the option to extend the lease, or not to exercise the option to terminate the lease. The Company revises the lease term if there is a change in the non-cancellable period of a lease.

Transition to Ind AS 116

Summary of Significant Accounting Policies

The Company used the following practical expedients when applying Ind AS 116 :

- Applied a single discount rate to a portfolio of leases with similar characteristics.
- Applied the exemption not to recognise right-of-use assets and liabilities for leases with less than 12 months of lease term and leases of low value.
- Excluded initial direct costs from measuring the right-of-use asset at the date of initial application.
- Used hindsight when determining the lease term if the contract contains options to extend or terminate the lease.

The Company adopted Ind AS 116 "Leases" and applied the standard to all lease contracts existing on April 1, 2019 using the modified retrospective method and has taken the cumulative adjustment to retained earnings, on the date of initial application. Consequently, the Company recorded the lease liability at the present value of the lease payments discounted at the incremental borrowing rate and the right of use asset at its carrying amount as if the standard had been applied since the commencement date of the lease, but discounted at the Company's incremental borrowing rate at the date of initial application.

Right of use asset: The Company recognises right-of-use asset representing its right to use the underlying asset for the lease term at the lease commencement date. The cost of the right-of-use asset measured at inception shall comprise of the amount of the initial measurement of the lease liability adjusted for any lease payments made at or before the commencement date less any lease incentives received, plus any initial direct costs incurred and an estimate of costs to be incurred by the lessee in dismantling and removing the underlying asset or restoring the underlying asset or site on which it is located. The right-of-use assets is subsequently measured at cost less any accumulated depreciation, accumulated impairment losses, if any and adjusted for any remeasurement of the lease liability. The right-of-use assets is depreciated using the straight-line method from the commencement date over the shorter of lease term or useful life of right-of-use asset. The estimated useful lives of right-of use assets are non-cancellable period of a lease. ar ended March 31, 2020) and accordingly, the Company has charged off the balance of MAT credit during the year ended March 31, 2020. ctual cash flows that are due to the Company in accordance with the contract and all the cash flows that the Co.....

Lease Liability: The Company measures the lease liability at present value of the future lease payments at the commencement date of the lease. The lease payments are discounted using the interest rate implicit in the lease, if that rate can be readily determined. If that rate cannot be readily determined, the Company uses incremental borrowing rate as at the commencement of lease. The lease liability is subsequently remeasured by increasing the carrying amount to reflect interest on the lease liability, reducing the carrying amount to reflect the lease payments made and remeasuring the carrying amount to reflect any reassessment or lease modifications or to reflect revised in-substance fixed lease payments. The Company recognises the amount of the re-measurement of lease liability due to modification as an adjustment to the right-of-use asset and statement of profit and loss depending upon the nature of modification. Where the carrying amount of the right-of-use asset is reduced to zero and there is a further non-cancellable period of a lease. ar ended March 31, 2020) and accordingly, the Company has charged off the balance of MAT credit during the year ended

k Borrowings and Borrowing cost

Borrowings are recognised initially at fair value, net of transaction costs incurred. Borrowings are subsequently stated at amortised cost. Any difference between the proceeds (net of transaction costs) and the redemption value is recognised in the income statement over the period of the borrowings using the effective interest rate method. Borrowings are classified as current liabilities unless the Company has an unconditional right to defer settlement of the liability for at least 12 months after the reporting date.

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

Interest income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation.

All other borrowing costs are recognised in statement of profit and loss in the period in which they are incurred.

l Earnings per share

Basic Earnings Per Share ('EPS') is computed by dividing the net profit attributable to the equity shareholders by the weighted average number of equity shares outstanding during the year. Diluted earnings per share is computed by dividing the net profit by the weighted average number of equity shares considered for deriving basic earnings per share and also the weighted average number of equity shares that could have been issued upon conversion of all dilutive potential equity shares. Dilutive potential equity shares are deemed converted as of the beginning of the year, unless issued at a later date. In computing diluted earnings per share, only potential equity shares that are dilutive and that either reduces earnings per share or increases loss per share are included. The number of shares and potentially dilutive equity shares are adjusted retrospectively for all periods presented for the share splits.

m Provision, contingent liabilities and contingent assets

i) Provision:

A provision is recognised if, as a result of a past event, the Company has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows (representing the best estimate of the expenditure required to settle the present obligation at the balance sheet date) at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The unwinding of the discount is recognised under finance costs. Expected future operating losses are not provided for. Provision in respect of loss contingencies relating to claims, litigations, assessments, fines and penalties are recognised when it is probable that a liability has been incurred and the amount can be estimated reliably.

ii) Contingent liabilities and contingent assets:

A contingent liability exists when there is a possible but not probable obligation, or a present obligation that may, but probably will not, require an outflow of resources, or a present obligation whose amount cannot be estimated reliably. Contingent liabilities do not warrant provisions, but are disclosed unless the possibility of outflow of resources is remote.

Contingent assets has to be recognised in the financial statements in the period in which if it is virtually certain that an inflow of economic benefits will arise. Contingent assets are assessed continually and no such benefits were found for the current financial year.

n Financial Instruments

A financial instrument is any contract that gives rise to a Financial Asset of one entity and Financial liability or equity instrument of another entity.

i) Initial Recognition and measurement

Financial assets and financial liabilities are initially recognised when the Company becomes a party to the contractual provisions of the instrument. A financial asset or financial liability is initially measured at fair value plus, for an item not at fair value through profit and loss (FVTPL), transaction costs that are directly attributable to its acquisition or issue.

ii) Classification and subsequent measurement

Financial assets

All financial assets except Trade receivables are initially measured at fair value plus, for an item not at fair value through profit and loss (FVTPL), transaction costs that are directly attributable to its acquisition or issue.

Subsequent measurement: For the purpose of subsequent measurement, financial assets are categorised as under:

- Amortised cost;
- Fair Value through Other Comprehensive Income (FVOCI) - equity investment; or
- Fair Value through Profit or Loss (FVTPL)

Financial assets are not reclassified subsequent to their initial recognition, except if and in the period the Company changes its business model for managing financial assets.

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

- the asset is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

On initial recognition of an equity investment that is not held for trading, the Company may irrevocably elect to present subsequent changes in the investment's fair value in OCI (designated as FVOCI - equity investment). This election is made on an investment-by-investment basis.

All financial assets not classified as measured at amortised cost or FVOCI as described above are measured at FVTPL. This includes all derivative financial assets. On initial recognition, the Company may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortised cost or at FVOCI as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

Financial assets at FVTPL: These assets are subsequently measured at fair value. Net gains and losses, including any interest or dividend income, are recognised in profit or loss.

Financial assets at amortised cost: These assets are subsequently measured at amortised cost using the effective interest method. The amortised cost is reduced by impairment losses. Interest income, foreign exchange gains and losses and impairment are recognised in profit or loss. Any gain or loss

Equity investments at FVOCI: These assets are subsequently measured at fair value. Dividends are recognised as income in profit or loss unless the dividend clearly represents a recovery of part of the cost of the investment. Other net gains and losses are recognised in OCI and are not reclassified to profit or loss.

Financial liabilities:

Financial liabilities are classified as measured at amortised cost or FVTPL. A financial liability is classified as at FVTPL if it is classified as held-for-trading, or it is a derivative or it is designated as such on initial recognition. Financial liabilities at FVTPL are measured at fair value and net gains and losses, including any interest expense, are recognised in statement of profit or loss. Other financial liabilities are subsequently measured at amortised cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognised in statement of profit or loss.

iii) Derecognition

Financial assets

A Financial asset is primarily derecognised when the right to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Company neither transfers nor retains substantially all of the risks and rewards of ownership and does not retain control of the financial asset.

If the Company enters into transactions whereby it transfers assets recognised on its balance sheet, but retains either all or substantially all of the risks and rewards of the transferred assets, the transferred assets are not derecognised.

Financial liabilities

The Company derecognises a financial liability when its contractual obligations are discharged or cancelled, or expired.

The Company also derecognises a financial liability when its terms are modified and the cash flows under the modified terms are substantially different. In this case, a new financial liability based on the modified terms is recognised at fair value. The difference between the carrying amount of the financial liability extinguished and the new financial liability with modified terms is recognised in profit or loss.

iv) Offsetting

Financial assets and financial liabilities are offset and the net amount reported in the balance sheet if there is a currently and legally enforceable right to set off the amounts and it intends either to settle them on a net basis or to realise the asset and settle the liability simultaneously.

o Impairment of assets

i) Impairment of financial instruments

The Company recognises loss allowances for expected credit losses on financial assets measured at amortised cost and trade receivables. At each reporting date, the Company assesses whether financial assets carried at amortised cost are credit-impaired. A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Evidence that a financial asset is credit-impaired includes the following observable data:

- significant financial difficulty of the borrower or issuer;
- a breach of contract;
- it is probable that the borrower will enter bankruptcy or other financial reorganisation; or
- the disappearance of an active market for a security because of financial difficulties.

The Company measures loss allowances at an amount equal to lifetime expected credit losses.

Loss allowances for trade receivables are always measured at an amount equal to lifetime expected credit losses.

Lifetime expected credit losses are the expected credit losses that result from all possible default events over the expected life of a financial instrument.

12-month expected credit losses are the portion of expected credit losses that result from default events that are possible within 12 months after the reporting date (or a shorter period if the expected life of the instrument is less than 12 months).

In all cases, the maximum period considered when estimating expected credit losses is the maximum contractual period over which the Company is exposed to credit risk.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating expected credit losses, the Company considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Company's historical experience and informed credit assessment and including forward-looking information.

Measurement of expected credit losses

The Company applies expected credit loss (ECL) model for measurement and recognition of loss allowance on the following:

- i. Trade receivables
- ii. Financial assets measured at amortised cost (other than trade receivables)
- iii. Financial assets measured at fair value through other comprehensive income (FVTOCI).

The Company follows a simplified approach wherein an amount equal to lifetime ECL is measured and recognised as loss allowance.

In case of other assets (listed as ii and iii above), the Company determines if there has been a significant increase in credit risk of the financial asset since initial recognition. If the credit risk of such assets has not increased significantly, an amount equal to 12-month ECL is measured and recognised as loss allowance. However, if credit risk has increased significantly, an amount equal to lifetime ECL is measured and recognised as loss allowance.

Subsequently, if the credit quality of the financial asset improves such that there is no longer a significant increase in credit risk since initial recognition, the Company reverts to recognising impairment loss allowance based on 12-month ECL.

ECL is the difference between all contractual cash flows that are due to the Company in accordance with the contract and all the cash flows that the Company expects to receive (i.e. all cash shortfalls), discounted at the original effective interest rate.

Lifetime ECL are the expected credit losses resulting from all possible default events over the expected life of a financial asset. 12-month ECL are a portion of the lifetime ECL which result from default events that are possible within 12 months from the reporting date.

ECL are measured in a manner that they reflect unbiased and probability weighted amounts determined by a range of outcomes, taking into account the time value of money and other reasonable information available as a result of past events, current conditions and forecasts of future economic conditions.

As a practical expedient, the Company uses a provision matrix to measure lifetime ECL on its portfolio of trade receivables. The provision matrix is prepared based on historically observed default rates over the expected life of trade receivables and is adjusted for forward-looking estimates. At each reporting date, the historically observed default rates and changes in the forward-looking estimates are updated.

Write-off

Summary of Significant Accounting Policies

The gross carrying amount of a financial asset is written off (either partially or in full) to the extent that there is no realistic prospect of recovery. This is generally the case when the Company determines that the debtor does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write-off. However, financial assets that are written off could still be subject to enforcement activities in order to comply with the Company's procedures for recovery of amounts due.

ii) **Impairment of non-financial assets**

The Company's non-financial assets are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated.

For impairment testing, assets that do not generate independent cash inflows are Companyed together into cash-generating units (CGUs). Each CGU represents the smallest Company of assets that generates cash inflows that are largely independent of the cash inflows of other assets or CGUs.

The recoverable amount of a CGU (or an individual asset) is the higher of its value in use and its fair value less costs to sell. Value in use is based on the estimated future cash flows, discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the CGU (or the asset).

An impairment loss is recognised if the carrying amount of an asset or CGU exceeds its estimated recoverable amount. Impairment losses are recognised in the statement of profit and loss.

In respect of assets for which impairment loss has been recognised in prior periods, the Company reviews at each reporting date whether there is any indication that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. Such a reversal is made only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss has been recognised.

p **Convertible preference shares**

Convertible preference shares are separated into liability and equity components based on the terms of the contract.

On issuance of the convertible preference shares, the fair value of the liability portion of an optionally convertible preference shares is determined using a market interest rate for an equivalent non-convertible bonds. This amount is recorded as a liability on an amortised cost basis until extinguished on conversion or redemption of the bonds. The remainder of the proceeds is attributable to the equity portion of the compound instrument since it meets Ind AS 32, Financial Instruments: Presentation, criteria for fixed to fixed classification. Transaction costs are deducted from equity, net of associated income tax. The carrying amount of the conversion option is not subsequently re-measured.

Transaction costs are apportioned between the liability and equity components of the convertible preference shares based on the allocation of proceeds to the liability and equity components when the instruments are initially recognized.

q **Events after reporting date**

Where events occurring after the balance sheet date provide evidence of conditions that existed at the end of the reporting period, the impact of such events is adjusted within the financial statements. Otherwise, events after the balance sheet date of material size or nature are only disclosed.

r **Recent accounting pronouncements:**

Ministry of Corporate Affairs ("MCA") notifies new standard or amendments to the existing standards under Companies (Indian Accounting Standards) Rules as amended from time to time. There are no such recently issued standards or amendments to the existing standards for which the impact on the Standalone Financial Information is required to be disclosed.

(iii) Adjustment for Other Comprehensive income					(0.72)
					(105.76)
Loss as per Ind AS					(264.26)

(f) **Analysis of changes in cash and cash equivalent for the purpose of statement of cash flows under Ind AS:**
No material impact on transition from Indian GAAP to Ind AS on the statement of cash flows.

(g) **Notes**

(i) **Recognition of Right of use assets**

Under the previous GAAP, rental expenditure for operating leases were recognised as expenditure on a straight-line basis over the lease period. During the current year, on transition to Ind AS, the Company has applied the principles of Ind AS 116 and recognised a right of use assets with a corresponding lease liability in the balance sheet by using the modified retrospective method effective from the transition date. Accordingly, the rental expenditure has been reversed and an amortisation charge on Right of use asset and interest on lease liability is recognised in the statement of profit and loss.

(ii) **Defined benefit obligation**

Both under Indian GAAP and Ind-AS, the Company recognised costs related to its post-employment defined benefit plan on an actuarial basis. Under Indian GAAP, the entire cost, including actuarial gains and losses, are charged to profit or loss. Under Ind-AS, remeasurements [comprising of actuarial gains and losses, the effect of the asset ceiling, excluding amounts included in net interest on the net defined benefit liability and the return on plan assets excluding amounts included in net interest on the net defined benefit liability] are to be recognised immediately in the balance sheet with a corresponding debit or credit to retained earnings through OCI. Whereas, the Company has recognised all the remeasurements to the Statement of profit and loss and decided to follow the same consistently.

(iii) **Employee stock option expense**

Under Previous GAAP, the cost of equity-settled and liability settled employee share-based plan were recognised using the intrinsic value method. Under Ind AS, the cost of share-based plan is recognised on the fair value of the options as at the grant date and reporting date as applicable.

(iv) The Company holds 49% of equity in the PayMate Payments Services Provider LLC, in IGAAP the investment is considered as an associate. However, based on the definition given under IND AS 110, the aforesaid investment is considered as subsidiary. Due to change in the classification of investments, the same is consolidated as subsidiary in the Standalone financial statements.

4. Right of use assets and Lease Liabilities

The company has lease contracts for office units. The company's obligations under its leases are secured by the lessor's title to the leased assets. There are several lease contracts that include extension and termination options.

The company has adopted Ind AS 116, effective annual reporting period beginning April 1, 2018 and applied the standard to its leases, under modified retrospective transition method.

The company has elected not to apply the requirements of Ind AS 116 "Leases" to short-term leases of all assets that have a lease term of 12 months or less and leases for which the underlying asset is of low value. The lease payments associated with these leases are recognized as an expense on a straight-line basis over the lease term except inflation adjustment.

(i) Movement in Right of use assets and Lease liabilities is given below:

Share issue expenses (refer note below)	85.08	-	-
Total	308.02	29.00	56.04

During the year ended March 31st, 2022 the Company has incurred share issue expenses in connection with proposed public offer of equity shares of which Rs. 85.08 mn is accounted for various services received for Initial Public Offering (IPO). In accordance with the Companies Act 2013 ("the Act") and also as per the Offer Agreement entered between the Company and the selling shareholders, the selling shareholders shall reimburse the share issue expenses in proportion to the respective shares offered for sale. Accordingly, the Company will partly recover the expenses incurred in connection with the Issue on completion of Initial Public Offer (IPO). The Company's share of expenses shall be adjusted against securities premium to the extent permissible under Section 52 of the Act on successful completion of IPO. The entire amount has been carried forward and disclosed under the head "Share issue expenses" under "other current financial assets" (to the extent of not written off or adjusted). The amount which is receivable from the selling shareholders is not disclosed separately as the amount is not determinable at this stage pending completion of the IPO.

(ii) Terms / rights attached to the Equity Shares:

The Company has only one class of equity shares having a par value of Rs. 1 per share (March 31, 2021, March 31, 2020 and March 31, 2019: Rs. 10 per share). Each holder of equity shares is entitled to one vote per share. The shareholders are entitled to dividends in Indian Rupees, proposed by the Board of Directors and subject to the approval of the shareholders in the Annual General Meetings. In the event of liquidation of the Company, the holders of equity shares will be entitled to receive remaining assets of the Company, after distribution of all preferential amounts. The distribution will be in proportion to the number of equity shares held by the shareholders.

Dues to micro and small enterprises have been determined to the extent such parties have been identified on the basis of information collected by the Management. This has been relied upon by the auditors.

27 Employee benefit plans

27.1 Defined contribution plans - provident fund

The Company makes Provident Fund scheme contributions to defined contribution plans for qualifying employees. Under the Schemes, the Company is required to contribute a specified percentage of the payroll costs to fund the benefits. The Company recognised the following contributions in the Statement of profit and loss.

Particulars	Year ended March 31, 2022	Year ended March 31, 2021	Year ended March 31, 2020
Provident fund	5.21	3.58	3.49

27.2 Defined benefit plan - gratuity

The Company provides for Gratuity for employees in India as per the Payment of Gratuity Act, 1972. Employees who are in continuous service for a period of 5 years are eligible for Gratuity. The amount of Gratuity payable on retirement/ termination is the employee's last drawn basic salary per month computed proportionately for 15 days salary multiplied for the number of years of service or part thereof in excess of six months, restricted to a sum of Rs. 20 lakhs.

The Group does not fund the liability.

This defined benefit plans expose the Group to actuarial risks, such as longevity risk, interest rate risk and market (investment) risk.

The liability for the Defined Benefit Plan is provided on the basis of a valuation, using the Projected Unit Credit Method, as at the Balance Sheet date, carried out by an independent actuary.

Particulars			
Current Liability	3.41	2.23	1.00
Non Current Asset/ (Liability)	11.98	9.31	7.91
Net Asset/(Liability)	15.40	11.54	8.91
Net asset / (liability) recognised in the Balance Sheet			
Present value of defined benefit obligation	15.40	11.54	8.91
Fair value of plan assets	-	-	-
Funded status [Surplus / (Deficit)]	(15.40)	(11.54)	(8.91)
Net asset / (liability) recognised in the Balance Sheet	(15.40)	(11.54)	(8.91)
Composition of the plan assets is as follows:			
Discount rate	6.70%	6.82%	6.71%
Attrition Rate	15.24%	8.50%	7.27%
Expected return on plan assets	NA	NA	NA
Salary escalation	10.00%	10.00%	8.00%

The discount rate is based on the prevailing market yields of Government of India securities as at the Balance Sheet date for the estimated term of the obligations.

Sensitivity Analysis

Reasonably possible changes at the reporting date to one of the relevant actuarial assumptions, holding other assumptions constant, would have affected the defined benefit obligation by the amounts shown below:

Gratuity Plan	As at March 31, 2022	As at March 31, 2021	As at 1 April 2020
Estimate value of obligation if discount rate higher by 1%	(0.72)	(0.74)	(0.59)
Estimated value of obligation if discount rate is lower by 1%	0.80	0.81	0.63
Estimate value of obligation if salary growth rate is higher by 1%	0.47	0.44	0.38
Estimate value of obligation if salary growth rate is lower by 1%	(0.50)	(0.38)	(0.35)
Estimate value of obligation if attrition rate is higher by 1%	(0.04)	(0.01)	0.01
Estimate value of obligation if attrition rate is lower by 1%	0.03	0.01	(0.01)

These sensitivities have been calculated to show the movement in defined benefit obligation in isolation and assuming there are no other changes in market conditions at the accounting date. There have been no changes from the previous periods in the methods and assumptions used in preparing the sensitivity analysis.

Maturity profile of defined benefit obligation:

Maturity profile, if it ensues	As at March 31, 2022	As at March 31, 2021	As at 1 April 2020
With in 1 year	3.53	2.29	1.03
1-2 Year	1.57	0.70	1.60
2-3 Year	1.65	0.74	0.53
3-4 Year	1.67	0.79	0.56
4-5 Year	1.55	1.08	0.59
Above 5 years	6.59	5.09	3.94

30 Earnings per equity share

Basic earnings per share amounts is calculated by dividing the profit/(loss) for the period / year attributable to equity holders by the weighted average number of equity shares outstanding during the period / year. Diluted earnings per share amounts is calculated by dividing the profit/(Loss) attributable to equity holders (after adjusting for dividend on the convertible preference shares) by the weighted average number of equity shares outstanding during the period / year plus the weighted average number of equity shares that would be issued on conversion of all the dilutive potential equity shares into equity shares.

Particulars	Year ended March 31, 2022	Year ended March 31, 2021
Earnings per equity share		
Loss attributable to equity shareholders	(527.83)	(264.26)
Original number of equity shares (post share split)*	3,58,973	3,44,167
Add: Impact of bonus issue	5,38,46,022	5,16,24,982
Weighted average number of equity shares for basic EPS (Nos.)	5,42,04,995	5,19,69,149
Effect of dilutive equivalent share options	93,87,049	66,51,870
Effect of dilutive equivalent Compulsory convertible preference shares	4,87,14,247	4,68,43,952
Weighted average number of equity shares for diluted EPS (Nos.)	11,23,06,291	10,54,64,971
Par value per equity share (₹)	1.00	1.00
Earning/(loss) per share - Basic (₹)	(9.74)	(5.08)
Earning/(loss) per share - Diluted (₹)#	(9.74)	(5.08)

*The Company on December 18, 2021, has split the Rs. 10 equity share into 10 shares of Re. 1 each. Accordingly, the earnings per share has been adjusted for subdivision of shares for the current and previous years presented in accordance with the requirements of Indian Accounting Standard (Ind AS) 33 - Earnings per share.

#The conversion of above mentioned potential equity shares would decrease loss per share from continuing ordinary activities, these are anti-dilutive in nature and thus the effects of anti-dilutive potential equity shares are not considered in calculating diluted earning per share.

31 Income Tax :

Particulars	Year ended March 31, 2022		Year ended March 31, 2021	
	Statement of profit and loss	Other comprehensive income	Statement of profit and loss	Other comprehensive income
Current Tax	-	-	-	-
Deferred tax	-	-	-	-
Income tax expense	-	-	-	-

As the company is incurring Losses, the provision for Income tax does not arise.

Deferred Tax

Deferred Tax The Company has unabsorbed depreciation and unused tax losses at the end of the year. The net deferred tax asset has not been recognised on such losses and unabsorbed depreciation, as the probable taxable profits for the entity are low before the unused tax losses or unabsorbed depreciation expire and also on consideration of prudence. The Company has not created deferred tax assets on the following.

Particulars	As at March 31, 2022	As at March 31, 2021
Accumulated unabsorbed depreciation loss	107.66	90.41
Accumulated unabsorbed business loss	568.93	438.04
Total	676.59	528.45
Unused tax losses which expire in financial years:		
2019-20	-	-
2020-21	-	-
2021-22	15.51	15.51
2022-23	3.99	3.99

Notes to Standalone Financial Statement

(All amounts are INR. in Millions, except for share data and unless otherwise stated)

32 Employee Stock Option plan

The stock compensation expense recognised for employee services received during the year ended March 31, 2022 and year ended March 31, 2021 were ₹ 243.84 and ₹ 103.69 respectively.

ESOP scheme 2014

The Board of Directors of the Parent Company at its meeting held on December 18, 2021, ratified the Paymate Employees Stock Option Plan-I 2014 ("ESOP Plan"). At the said meeting, the Board authorised the Compensation Committee for the superintendence of the ESOP Plan. ESOP is the primary arrangement under which shared plan service incentives are provided to certain specified employees of the Company. Employees covered under Stock Option Plans are granted an option to purchase shares of the Company at the respective exercise prices, subject to requirements of vesting conditions. These options generally vest in tranches over a period of one to five years from the date of grant. Upon vesting, the employees can acquire one equity share for every option. The normal Excise Period is 5 years from the date the options become vested options or such period as extended by the Compensation committee.

The fair value of equity-settled award is estimated on the date of grant with the following assumptions:

Particulars	ESOP Plan	ESOP Plan	ESOP Plan	ESOP Plan	ESOP Plan	ESOP Plan
Grant Date	19-02-2022 (Vest 2)	19-02-2022 (Vest 1)	20-1-2022	24-11-2021 (Vest 2)	24-11-2021 (Vest 1)	09-Jul-21
Weighted average share price* (₹)	105.35	105.35	105.35	52.66	52.66	52.66
Exercise price (₹)	1	1	1	1	1	1
Expected volatility (%)	38.63%	41.35%	38.79%	37.03%	39.36%	38.84%
Expected life of the option (years)	4.74	3.74	3.65	4.5	3.5	3.5
Expected dividends (%)	0.00%	0.00%	0.00%	0.00%	0.00%	0.00%
Risk-free interest rate (%)	5.71%	5.37%	5.37%	5.55%	5.18%	5.29%
Weighted average fair value as on grant date* (₹)	104.59	104.53	104.53	52.66	52.66	52.66

*The aforementioned shares are post subdivision of equity shares (refer note 13).

A summary of the general terms of grants under stock option plan

Name of Plan	Number of options reserved under the plan as at March 31, 2022	Number of options reserved under the plan as at March 31, 2021	Number of options reserved under the plan as at April 1, 2020
PayMate Employees Stock Option Plan-I 2014*	2,18,95,000	1,81,20,000	1,81,20,000

*The aforementioned shares are post subdivision of equity shares (refer note 13).

The outstanding position as at each year end are summarised below:

Particulars	As at March 31, 2022	As at March 31, 2021	As at 1 April 2020
Outstanding at the beginning of the period /year	1,03,66,150	50,13,200	36,69,300
Granted during the period/year	41,82,700	55,47,740	13,43,900
Exercised during the period/year	31,30,230	-	-
Modification during the period/year	-	-	-
Expired during the period/year	-	-	-
Forfeited during the period/year	1,47,980	1,94,790	-
Outstanding at the end of the period/year	1,12,70,640	1,03,66,150	50,13,200
Exercisable at the end of the period/year	64,22,030	43,17,090	35,16,790

*The aforementioned shares are post subdivision of equity shares (refer note 13).

The following table summarises information about outstanding stock options:

Particulars	As at March 31, 2022	As at March 31, 2021	As at 1 April 2020
Number of options*	1,12,70,640	1,03,66,150	50,13,200
Weighted average remaining life (months)	4	4	2.10

*The aforementioned shares are post subdivision of equity shares (refer note 13).

The fair value of the awards are estimated using the Black-Scholes Model for time and non-market performance-based options.

The inputs to the model include the share price at date of grant, exercise price, expected volatility, expected dividends, expected term and the risk free rate of interest.

33 Financial instruments

The carrying value and fair value of financial instruments by categories as at March 31, 2022, March 31, 2021 & April 01, 2020 is as follows:

Particulars	Amortised cost		
	As at March 31, 2022	As at March 31, 2021	As at 1 April 2020
Financial assets			
Investment	2.85	2.85	2.85
Trade receivable	57.40	8.05	13.33
Cash and cash equivalents	30.03	27.03	97.22
Other bank balances	7.34	10.31	64.42
Loans	82.90	34.25	21.41
Other financial assets	314.42	35.99	62.35
Total assets	494.94	118.48	261.58
Financial liabilities			
Lease liabilities	15.33	19.17	22.07
Trade payables	23.01	3.74	3.02
Total liabilities	38.34	22.91	25.09

The management assessed that fair value of cash and short-term deposits, trade receivables, trade payables, and other current financial assets and liabilities approximate their carrying amounts largely due to the short-term maturities of these instruments.

The fair value of the financial assets and liabilities is included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.

Level 1 - Quoted prices (unadjusted) in active markets for identical

Level 2 - Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level 3 - Inputs for the assets or liabilities that are not based on observable market data (unobservable inputs).

There have been no transfers among Level 1, Level 2 and Level 3 during the year.

B. Financial risk management

The Group activities expose it to market risk, liquidity risk and credit risk. This note explains the sources of risk which the entity is exposed to and how the entity manages the risk.

Risk	Exposure arising	Measurement	Management
Credit risk	Trade receivables, security deposits, bank deposits and loans.	Ageing analysis. Credit score of customers/ entities.	Monitoring the credit limits of customers and obtaining security deposits
Liquidity risk	Borrowings	Cash flow forecasts managed by finance team under the overview of Senior Management.	Working capital management by Senior Management. The excess liquidity is channelised through bank deposits.

The Group's risk management is carried out by the Senior Management under policies approved by the Board of Directors. The Board of Directors provides guiding principles for overall risk management, as well as policies covering specific areas such as credit risk and liquidity risk.

Risk management framework

The Group's board of directors have overall responsibility for the Group's risk management framework. The board of directors are responsible for developing and monitoring the Group's risk management policies. The board of directors monitors the compliance with the Group's risk management policies and procedures, and reviews the adequacy of the risk management framework in relation to the risks faced by the Group.

The Group's risk management policies are to identify and analyze the risks faced by the Group, to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Group's activities. The Group, through its training and management standards and procedures, aims to maintain a disciplined and constructive control environment in which all employees understand their roles and obligations.

Credit risk

Credit risk is the risk of financial loss to the Group if a customer or counterparty to a financial instrument fails to meet its contractual obligations, and arises principally from the Group's receivables from customers and investment securities. Credit risk arises from cash held with banks and financial institutions, as well as credit exposure to clients, including outstanding accounts receivable. The maximum exposure to credit risk is equal to the carrying value of the financial assets. The objective of managing counterparty credit risk is to prevent losses in financial assets. The Group assesses the credit quality of the counterparties, taking into account their financial position, past experience and other factors.

The Group's exposure to credit risk is influenced mainly by the individual characteristics of each customer. The demographics of the customer, including the default risk of the industry and country in which the customer operates, also has an influence on credit risk assessment.

The following table gives details in respect of revenues generated from top customer and top 5 customers:

Particulars	Year ended March 31, 2022	Year ended March 31, 2021
Revenue from top customer	2,276.30	594.12
Revenue from top 5 customers (other than above customer)	5,139.54	1,677.59

One customer accounted for more than 19% of the revenue for the year ended March 31, 2022. One customer accounted for more than 17% of the revenue for the year March 31, 2021.

Liquidity risk

Liquidity risk is the risk that the Group will encounter difficulty in meeting the obligations associated with its financial liabilities that are settled by delivering cash or another financial asset. The Group's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when they are due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Group's reputation.

The table below provides details regarding the undiscounted contractual maturities of significant financial liabilities.

As at March 31, 2022

	Carrying value	Less than 1 year	1-5 years	More than 5 years	Total
Lease liabilities	15.33	5.05	10.28	-	15.33
Short-term borrowings	-	-	-	-	-
Trade payables	23.01	19.28	3.73	-	23.01
Total	38.34	24.33	14.01	-	38.34

As at March 31, 2021

	Carrying value	Less than 1 year	1-5 years	More than 5 years	Total
Lease liabilities	19.17	3.84	15.33	-	19.17
Short-term borrowings	-	-	-	-	-
Trade payables	3.74	3.68	0.06	-	3.74
Total	22.91	7.52	15.39	-	22.91

As at 1 April 2020

	Carrying value	Less than 1 year	1-5 years	More than 5 years	Total
Lease liabilities	22.07	2.90	19.17	-	22.07
Short-term borrowings	-	-	-	-	-
Trade payables	3.02	2.76	0.26	-	3.02
Total	25.09	5.66	19.43	-	25.09

Foreign Currency risk

The Group's exchange risk arises from its foreign operations, foreign currency revenues and expenses, (primarily in U.S. dollars). A significant portion of the Group's revenues are in these foreign currencies, while a significant portion of its costs are in Indian rupees. As a result, if the value of the Indian rupee appreciates relative to these foreign currencies, the Group's revenues measured in rupees may decrease. The exchange rate between the Indian rupee and these foreign currencies has changed substantially in recent periods and may continue to fluctuate substantially in the future. The Group's management meets on a periodic basis to formulate the strategy for foreign currency risk management.

Consequently, the Group management believes that the payables in foreign currency and its assets in foreign currency shall mitigate the foreign currency risk mutually to some extent

The following table presents foreign currency risk from non-derivative financial instruments as of March 31, 2022, March 31, 2021 & April 01, 2020.

Particulars	As at	Amount in USD	INR (in MM)
Assets - Trade receivables			
	31-Mar-22	8,288.83	0.63
	31-Mar-21	92,842.85	6.74
	01-Apr-20	-	-

Foreign currency sensitivity analysis

The following table details the Group's sensitivity to a 5% increase and decrease in INR against the USD. 5% is the sensitivity rate used when reporting foreign currency risk internally to key management personnel and represents management's assessment of the reasonably possible change in foreign exchange rates. The sensitivity analysis includes only outstanding foreign currency denominated monetary items and adjusts their translation at the period end for a 5% change in foreign currency rates. A negative number below indicates an decrease in profit or equity where the INR strengthens 5% against the relevant currency. For a 5% weakening of the INR against the relevant currency, there would be a comparable impact on the profit or equity, and the balances below would be positive.

Particulars	Year ended	Year ended
	March 31, 2022	March 31, 2021
Impact on profit or (loss) for the period / year in case on 5% strengthening of INR	(0.03)	(0.34)
Impact on profit or (loss) for the period / year in case on 5% weakening of INR	0.03	0.34

Capital management

The Group's objective when managing capital is to safeguard its ability to continue as going concern so that the Group is able to provide minimum return to share holders and benefit for other stakeholders; and maintain an optimal capital structure to reduce the cost of capital.

The Group maintains its financial framework to support the pursuit of value growth for shareholders, which ensuring a secure financial base. In order to maintain or adjust the capital structure, the Group may vary the distribution of dividends to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt.

The capital structure of the Group consists of debt and total equity of the Group.

The Group's management review the capital structure of the Group on quarterly basis. As part of the review, the management considers the cost of capital and the risks associated with each class of capital requirements and maintenance of adequate liquidity.

Gearing Ratio (Net Debt to Equity Ratio)

Particulars	As at		
	As at March 31, 2022	As at March 31, 2021	As at 1 April 2020
Debt	-	-	-
Less: Cash & Bank Balances	30.03	27.03	97.22

42 Ratios as per the Schedule III requirements

a) Current Ratio (Current Assets divided by Current Liabilities)

Particulars	Year ended March 31, 2022	Year ended March 31, 2021
Current Assets (A)	644.80	194.00
Current Liabilities (B)	132.22	40.36
Ratio (C=A/B)	4.88	4.81
% Change from previous period / year	1%	

Note on Variance:

The increase in current ratio from March 31, 2021 to March 31, 2022 was primarily on account of the security deposit provided to Bennett Coleman and Company Limited of ₹ 175.43 million and share issue expenses of ₹ 85.08 million.

b) Debt Equity ratio (Total debt divided by Total equity where total debt refers to sum of current & non current borrowings):

Particulars	Year ended March 31, 2022	Year ended March 31, 2021
Total debt (A)	-	-
Total equity (B)	547.23	206.21
Ratio (C=A/B)	-	-
% Change from previous period / year	0%	

c) Return on Equity Ratio / Return on Investment Ratio (Net profit after tax divided by Total Equity)

Particulars	Year ended March 31, 2022	Year ended March 31, 2021
Net profit after tax (A)	(527.83)	(264.26)
Total equity (B)	547.23	206.21
Ratio (C=A/B)	-96.45%	-128.15%
% Change from previous period / year	25%	

Note on Variance:

The return on equity has increased in March 2022 as compared to March 2021 mainly due to Rs. 425 million capital raised in FY 2021-22.

d) Trade Receivables turnover ratio = Credit Sales divided by Closing trade receivables

Particulars	Year ended March 31, 2022	Year ended March 31, 2021
Revenue from Operations (A)	12,088.01	3,484.00
Average Trade Receivables (B)	32.73	10.69
Ratio (C=A/B)	369.38	325.91
% Change from previous period / year	13%	

e) Trade payables turnover ratio (Credit purchases divided by Average trade payables)

Particulars	Year ended March 31, 2022	Year ended March 31, 2021
Credit Purchases (A)	12,072.05	3,485.08
Average Trade Payables (B)	13.33	3.38
Ratio (C=A/B)	905.36	1,030.80
% Change from previous period / year	-12%	

f) Net capital Turnover Ratio (Revenue divided by Net Working capital (current assets - current liabilities))

Particulars	Year ended March 31, 2022	Year ended March 31, 2021
Revenue from Operations (A)	12,088.01	3,484.00
Net Working Capital (B)	512.58	153.64
Ratio (C=A/B)	23.58	22.68
% Change from previous period / year	4%	

PayMate India Limited (formerly known as PayMate India Private Limited)
(CIN: U72200MH2006PLC205023)
Notes to Standalone Financial Statement
(All amounts are INR, in Millions, except for share data and unless otherwise stated)

g) Net profit ratio (Net profit after tax divided by Revenue)

Particulars	Year ended March 31, 2022	Year ended March 31, 2021
Net profit after tax (A)	(528.52)	(263.54)
Revenue from Operations (B)	12,088.01	3,484.00
Ratio (C=A/B)	-4.37%	-7.56%
% Change from previous period / year	42%	

This ratio has improved from -7.56% in March 2021 to -4.45% in March 2022 mainly due to increase in sales which was due to increase in the business volumes in terms of products mix, and new customers & markets and improved profitability margins.

h) Return on Capital employed (Adjusted Earnings before interest and taxes Less other income divided by Capital Employed)

Particulars	Year ended March 31, 2022	Year ended March 31, 2021
Profit before tax (A)	(527.83)	(264.26)
Add: Finance Costs (B)	2.83	2.24
EBIT (C) = (A)+(B)	(525.00)	(262.02)
Less: Other Income (D)	8.13	4.38
Adjusted EBIT (E) = (C)-(D)	(533.13)	(266.40)
Total Equity (F)	547.23	206.21
Return on Capital Employed (G=E/F)	-97.42%	-129.19%
% Change from previous period / year	25%	

The return on capital employed has increased in March 2022 as compared to March 2021 mainly due to Rs. 425 million capital raised in FY 2021-22.

i) Return on Investment

Particulars	Year ended March 31, 2022	Year ended March 31, 2021
Net profit after tax (A)	(528.52)	(263.54)
Average Total Assets (B)	486.46	349.70
Ratio (C=A/B)	-108.65%	-75.36%
% Change from previous period / year	-44%	

The return on Investment has decreased in March 2022 as compared to March 2021 mainly due to decrease in Earnings before interest and taxes (EBIT) which is due to higher cost of employee benefit expenses and losses at gross margin level.

43 Previous years figures have been reclassified/regrouped wherever necessary to correspond with the current year classification (or) disclosures.
